# "WP GeoIP Country Redirect"

**Created: Oct 2013**

**By: Alex Crivion**

**Email: office@crivion.com**

Thank you for purchasing my plugin. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form here. Thanks so much!

## Table of Contents

## A) Installing the plugin - top

Installing the plugin is very easy just like any other wordpress plugin.

Connect to your hosting and upload the extracted zip file folder of the plugin into wp-content/plugins/

Then go to wp-admin->plugins->and activate WP GeoIP Country Redirect

## B) Importing the CSV - top

The first thing after installation is the import the countries CSV.

After you have downloaded, unpack the archive and place it in the same folder as the PLUGIN. Now go to wp-admin->wp geoip->import page. That's it.

Download link of the free CSV file : Download

## C) Adding Redirect Rules - top

Adding redirect rules is very simple. Just go to WP GeoIP page in wp-admin panel and choose the target country and page/post/category.

## D) Log page - top

The log page shows you the latest users redirected based on the rules you've created.

Also, if your install failed due the your hosting mysql or any other error go to the log page and please send me the exact error in there.
