Find a thread on which you can make an intelligent post. This is a math forum and if you are not an "expert" in math, I would recommend following the example of the other posters. You can "spin" their posts in your own words. Let your post age for at least 7 days.

 [User Control Panel](#)

Go to your User Control Panel.

The image shows two side-by-side screenshots from a forum interface. The left screenshot is titled 'Options' and has a sidebar menu with 'Overview', 'Profile', '> Edit profile', '> Edit signature', '> Edit avatar', and '> Edit account settings'. The 'Profile' and 'Edit signature' items are highlighted with red boxes. Below the menu, it says '1. Click Profile' and '2. Click Edit Signature'. The right screenshot is a signature editor. It has a text area with the instruction 'This is a block of text that can be added to posts you make. There is a 512 character limit.' Below the text area are buttons for formatting: B (bold), i (italic), u (underline), Code, List, List=, [*] (bullet), Img, URL, and a Font size dropdown set to 'Normal'. There are also buttons for 'spoiler' and 'tex'. A tip at the bottom says 'Tip: Styles can be applied quickly to selected text.'
